Sriyogya is the kind of student who brings energy and purpose to everything she does.

A genuine marketing enthusiast, she approaches the subject with real curiosity and creativity. She does well academically, but what makes her stand out is how she applies that knowledge beyond the classroom. Through her active involvement in clubs and extracurriculars, she has shown she can lead, collaborate, and get things done.

Sriyogya has the drive, and skills that marketing truly demands. She will be a great addition to any team that values both thinking and doing.

I am pleased to recommend Sriyogya Guggulla, who was a student in my Production and Operations Management (POM) course during the BBA program at Mahindra University. Sriyogya distinguished herself through consistent academic excellence, ultimately earning an A in the course. Beyond grades, what stood out was a strong analytical mindset and the ability to connect theoretical concepts with practical, real-world business situations. Whether it was understanding supply chain dynamics, process optimization, or decision-making under uncertainty, she approached each topic with clarity and rigor. In classroom discussions and assignments, Sriyogya demonstrated initiative, intellectual curiosity, and a willingness to engage deeply with complex problems. The student also showed excellent discipline in meeting deadlines and presenting structured, well-thought-out work. I am confident that Sriyogya will continue to excel in future academic and professional pursuits. I highly recommend her to any organization or institution seeking a motivated, capable, and thoughtful individual.
